

Wafa JAAFAR

AI Engineer | Data Scientist | Software Engineer

Morocco | wafajaafarr@gmail.com | +212 6 15 43 06 18 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Master's graduate in Artificial Intelligence and Data Analytics from Ibn Zohr University (2026), with hands on experience in machine learning, data analytics and generative AI. Built and deployed LLM based systems from prototype to production (RAG pipelines, AI agents, FastAPI backends, n8n orchestration) and delivered predictive models and Power BI dashboards for business teams. Comfortable across the full cycle, from data preparation and modeling to evaluation, APIs and deployment.

PROFESSIONAL EXPERIENCE

AI Engineering & Automation Intern ProspectAI (Final Year Project), Tweadup	<i>Feb 2026 to Aug 2026</i>
- Designed and built ProspectAI, a B2B SaaS platform for AI driven prospecting, as the Master's final year project: an AI agent for automated outreach, a RAG pipeline for contextual messaging, and an LLM layer for lead qualification. - Automated the full sales workflow with n8n, including scraping, ML based lead scoring, CRM integration and email sending, and built the backend with FastAPI and PostgreSQL. - Deployed a multilingual conversational agent on WhatsApp through the Meta API for a real estate client, handling appointment booking via Google Calendar and data collection in Google Sheets.	
Generative AI Evaluator & Tester (Freelance) Innodata / Alignerr	<i>2025 to Present</i>
Evaluate and benchmark LLM outputs at scale for a multilingual enterprise project, analyzing failure modes, writing internal guidelines, and supporting non technical teams in adopting AI tools.	
Data Science Intern DATASTORY, Casablanca	<i>Apr 2023 to Jun 2023</i>
- Built customer segmentation and predictive analytics models in Python (Pandas, Scikit-learn) on client data to support business decisions. - Automated data preparation pipelines (extraction, cleaning, transformation) to make analyses repeatable. - Delivered insights through Power BI dashboards with DAX based KPIs, presented to non technical decision makers.	

EDUCATION

Master of Excellence, Data Analytics & Artificial Intelligence , Ibn Zohr University, Agadir	<i>2024 to 2026</i>
Licence of Excellence, Data Analytics & Artificial Intelligence , Ibn Zohr University, Agadir	<i>2023 to 2024</i>
University Diploma of Technology (DUT), AI & Emerging Tech , Moulay Ismail University, Meknes	<i>2021 to 2023</i>

SKILLS

Generative AI & LLMs: RAG, AI agents, prompt engineering, model evaluation, Claude, ChatGPT, Gemini, LangChain
ML & Deep Learning: PyTorch, TensorFlow, Keras, Scikit-learn, OpenCV, NLP, Computer Vision, transfer learning, reinforcement learning
Software Engineering: Python, FastAPI, REST API design, microservices, PostgreSQL, object oriented programming, Docker, Git/GitHub, Linux, unit testing, CI basics
Data & Analytics: SQL, Pandas, NumPy, statistical analysis, feature engineering, predictive modeling, time series
Automation & DevOps: n8n, workflow automation, API integration, Google Workspace APIs
Visualization & BI: Power BI, DAX, Plotly, Streamlit, Matplotlib, Seaborn
Big Data: Hadoop, HDFS, Spark, MLlib, ETL, data pipelines, streaming data
Tools & Methods: ONNX, JAX, LaTeX, Jupyter, VS Code, Agile, AI assisted development (Claude Code, Cursor, Copilot)
Soft Skills: Autonomy, rigor, curiosity, problem solving, technical communication, teamwork, adaptability

PROJECTS

ProspectAI, B2B Generative AI SaaS
Full agentic platform combining n8n for workflow orchestration, an AI agent, a RAG pipeline, LLM based lead qualification and a FastAPI microservice. Presented to an academic jury.
<i>Tools: n8n, LLMs, RAG, AI agents, Python, FastAPI, PostgreSQL, Claude</i>
Multilingual WhatsApp Agent, Real Estate
Conversational agent deployed in production, handling client requests, booking appointments through Google Calendar and logging data in Google Sheets, in Arabic, French and Darija.
<i>Tools: n8n, Meta/WhatsApp API, LLMs, Google Workspace APIs</i>
Tifinagh OCR, Deep Learning
Neural decoder for Tifinagh script recognition, using a CRNN architecture (VGG16-BN + BiLSTM + CTC) built from scratch in PyTorch for a script with no existing baseline.
<i>Tools: PyTorch, CNN, BiLSTM, CTC loss, sequence modeling</i>
Intelligent Recruitment System, LLMs & RAG
AI platform for resume analysis, skill extraction and candidate to job matching from unstructured data.
<i>Tools: LLMs, RAG, embeddings, FastAPI, ChromaDB</i>
Real Time Bank Fraud Detection
Real time ML system on Spark MLlib for detecting fraudulent transactions, served through a Flask API and deployed with Docker.
<i>Tools: Spark MLlib, Hadoop, Flask, Docker, streaming data</i>

CERTIFICATIONS & LANGUAGES

Advanced Learning Algorithms, DeepLearning.AI Supervised Machine Learning: Regression & Classification, DeepLearning.AI & Stanford Online AWS Data Analytics Specialty, Packt (2023)
Languages: Arabic (native) French (B2) English (C1)
